# Crashzone Time App

The Crashzone time tpp works inconjution with the Crashzone.com.au website application to record the time of the users activity when repairing a motor vehicle

1. download app to your iPhone

from the app store search crashzone
click on crashzone time mangement app to install and follow prompts

2. load app up

from the iPhone home page click on the crashzone time management app (short name CZ Time) to load up

## 3. setup your username and password in app

demo account

username = timemanagement@crashzone.com.au
password = test

Click on Save button to save login details and continue

4. user selection page

click on the user photo that belows to you
(for this demo click on the first user with a hat on)

5. job selection page

click on the vehicle that relates to the job the user wants to record their time
(for this demo please click on the red car)
NOTE #1 the image quality of the vehicle photos are based on the digial camera the user in
the crashzone.com.au website application takes. The standard for the vehicle repair industry in
Australia is 640x480 or less
6. job timer page

Once the page loads the time will automatically start.

The basic job details are provided and the vehicle photo (NOTE #1 about image quality)

To stop and start the time click on the photo of the vehicle or leave the page with the left arrow at top of page.
NOTE #2 the time must go longer than 10 seconds before recording of the time is sent to the crashzone.com.au website app

To view the quote list (quote list made by crashzone.com.au website app) click on the document icon. Click on document icon to go back

Summary of App
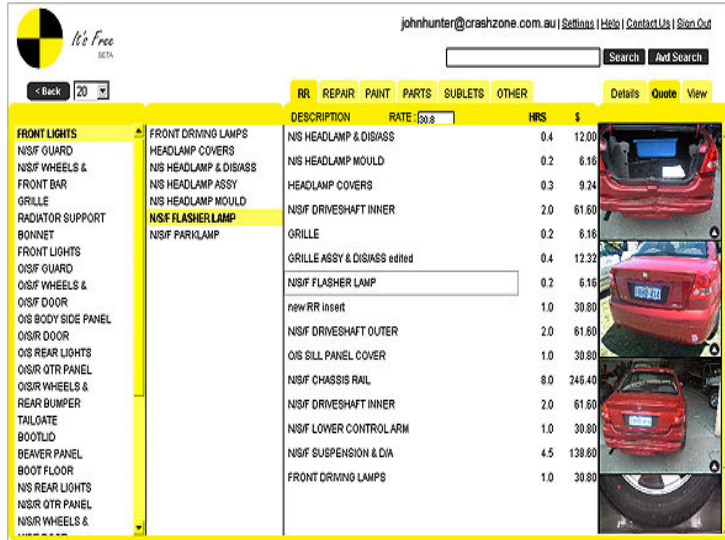

Once completing the 6 points above you will have recorded some time on a crashzone job. To see the time recorded the user will need to access the crashzone.com.au website app and go into the job. This is usually done by the owner or boss of the vehicle repair company. For this demo please log into the crashzone.com.au website below and follow the points.

7. goto test.crashzone.com.au
